

Jacinta Onyeabor

ABOUT ME

A Nurse Who Speaks Your Language

I am a Registered Nurse and certified Medical Virtual Assistant with over two years of remote healthcare administration experience. My

clinical background sets me apart from general virtual assistants — I understand medical workflows, documentation standards, and the pressures healthcare providers face every day.

This means I can integrate into your practice with minimal onboarding, handle sensitive patient information with the same confidentiality standards you hold yourself to, and contribute meaningfully from day one — not just administratively, but clinically.

I have worked with healthcare providers across the UK and internationally, and I am fully eligible to work in the United Kingdom with a National Insurance Number and Share Code available.

CORE COMPETENCIES

Medical VA Skills

Clinical knowledge combined with remote administrative precision — across every tool a modern healthcare practice relies on.

EHR Documentation & Records

Accurate management of electronic health records, patient data entry, clinical documentation, and records compliance across multiple platforms.

[Kareo](#)[SimplePractice](#)[DrChrono](#)[Athenahealth](#)[Epic](#)

Patient Scheduling & Coordination

End-to-end appointment management — scheduling, confirmations, reminders, rescheduling, and calendar optimisation for busy clinical practices.

[Google Calendar](#)[Acuity Scheduling](#)[Calendly](#)

Telehealth Support

Full telehealth session support — platform setup, patient onboarding, session coordination, follow-up documentation, and technical troubleshooting.

[Zoom for Healthcare](#)[Doxy.me](#)[MS Teams](#)

HIPAA & GDPR Compliance

All patient data and healthcare communications handled with strict adherence to HIPAA standards and UK GDPR requirements — confidentiality is non-negotiable.

[HIPAA Awareness](#)[GDPR \(UK\)](#)[Secure Comms](#)

Clinical Summaries & Transcription

Preparation of structured clinical summaries, patient reports, and medical transcriptions — translating complex clinical information into clear, accurate written records.

Medical Transcription

Clinical Reporting

Documentation

Medical Inbox Management

Triage of clinical emails, patient query responses, urgent communication escalation, and inbox organisation — keeping your communications clear and nothing missed.

Gmail

Outlook

Zendesk

Insurance Verification Support

Assistance with insurance verification processes, patient eligibility checks, prior authorisation support, and billing coordination to reduce administrative delays.

EHR Billing Modules

Insurance Portals

CRM & Lead Generation

Management of patient and prospect CRM databases, pipeline building for private practices, and lead generation support to help grow your practice.

HubSpot

Zoho CRM

Zendesk

Project & Admin Coordination

Multi-client project management, task tracking, deadline management, and cross-team coordination — keeping operations running smoothly behind the scenes.

Asana

Trello

Google Workspace

WORK SAMPLES

Portfolio

Real work and demonstrated skills across the tools healthcare providers rely on daily.

GOOGLE CALENDAR

Monthly Calendar Management

Full monthly calendar management using Google Calendar — organising a busy provider's schedule with colour-coded event categories, protected deep work blocks, available client slots, and multi-week scheduling visibility.

- Colour-coded events by type: meetings, breaks, deep work, available slots
- Multi-stakeholder scheduling across a full month view
- Holiday and recurring event management
- Proactive gap identification and schedule protection

GOOGLE CALENDAR

Daily Schedule & Time-Blocking

Detailed day-view calendar management showing a full structured working day — from early morning executive reviews through to end-of-day vendor calls — with logical sequencing, time buffers, and clear task categorisation.

- Morning-to-evening schedule with no overlaps
- Time-blocking for focus, admin, client calls, and reviews
- Structured breaks and buffer time management
- Multi-stakeholder coordination across one day

MEETING COORDINATION

Meeting Setup & Guest Coordination

Full meeting scheduling workflow — creating named events, setting times, composing professional reminder messages, managing guest lists, and integrating Google Meet links for seamless virtual meetings.

- Professional meeting invite with written reminder
- Multi-guest management and calendar invitations
- Google Meet integration for telehealth-style virtual meetings
- Cross-timezone scheduling awareness

GMAIL

Inbox Triage & Email Management

High-volume inbox management using Gmail's full feature set — custom label creation, priority flagging, inbox categorisation, and structured email triage to ensure no communication is missed or delayed.

- Custom colour-coded labels: Urgent, Waiting, Important, Traveling, Parcel
- Inbox organised across Primary, Promotions, Social, and Updates
- Starred message tracking for priority follow-up
- VA-specific label system for client account management

GOOGLE SHEETS

Client Data Management

Structured client contact database built and maintained in Google Sheets — capturing name, email, phone, and location fields for a multi-record client list with consistent formatting and data accuracy.

- Clean, structured database with consistent column formatting
- Multi-record data entry with zero-error accuracy

- Directly transferable to patient contact lists and EHR data
- Built for easy filtering, sorting, and reporting

ASANA

Project Management — Asana

Multi-task project management using Asana's list view — with task assignments, priority levels, due dates, and content type tags organised into clear workflow sections for full project visibility.

- Tasks organised into To Do and In Progress sections
- Priority tagging: High and Medium with visual indicators
- Due date assignment and deadline tracking
- Content type categorisation: Planning, Graphics, Engagement

TRELLO

Project Management — Trello

Visual Kanban workflow management using Trello — tracking tasks across To Do, In Progress, Review, and Completed columns with deadline ranges, colour-coded priority labels, and completion tracking.

- Full Kanban board across four workflow stages
- Task cards with date ranges and priority colour labels
- Completion tracking with documented finished tasks
- Clear ownership and progress visibility for clients
